

Dear Alfredo SI-BOK,

My name is Danilo (Danny) Hajdukovic.

In September 06, Myself and Anto (Tony) Abramovic were awarded the title of SI-FU in Hong Kong and have just opened a humble little school in Canberra representing Wan Kam Leung SI-GUNG's Practical Wing Chun Kung Fu System.

I have just finished reading your instructors profile which inspired me to write you this email. I am immensely impressed with your humble yet candid approach to life, students and your Wing Chun.

It was so refreshing to read something absent of the standard bastardisation of other martial arts styles including versions of WC that is currently flooding the market.

We believe that the beautiful thing about accepting traditional / alternate interpretations of WC is that we can ALL continue to learn from one another. This attitude is surely a more beneficial approach towards the progression and growth of this brilliant style of Kung Fu.

The lack of etiquette, honor and integrity you speak of hits the nail square on the head in terms of the majority of instructors not looking outside of their own egos, stopping them from growing beyond that invisible plateau they've hit.

If myself and/or Tony are anywhere in the vicinity of your School, William Cheung SI-GUNG....rest assured we will bring our humble learning caps and grant you all the deserved respect.

As we are the first school in Australia to truly represent Wan Kam Leung SI-GUNG and his complete system.....our website and information may not be of the highest standard as yet. We haven't advertised at all...just word of mouth thus far. Like yourself, the money side of things does not even come into the equation.

If you have time...please have a look at our site and offer any constructive criticism via email or blog. We will definitely take on board ideas/comments from a long established school such as yours.

www.practicalwingchun.com.au

"Quality vs Quantity".....no compromise.

All our best wishes and respect to you and your Kung Fu family

Cheers

Danilo SI-FU
